

VERY THICK-LEAVED HOSTAS

Hostas with particularly thick-substanced foliage. Dimensions are in thousandths of an inch, measured between the leaf veins. Those hostas with leaves that have been found to be at least .013"/.33mm thick are listed below, beginning with thickest-leaved plants first.

.017"/.43mm

'Rhino Hide'

.015"/.38mm

'Grand Marquee'

'Linda Sue'

'Touch of Class'

.014"/.36mm

'Blue Mouse Ears'

.013"/.33mm

'Americana'

'Heat Wave'

'Kiwi Blue Baby'

'Kiwi Summer Haze'

'Liberty'

'Remember Me'

'Revolution'

'St. Paul'

'Thunderbolt'

'Whirling Dervish'

The leaves of most hostas are .007-.011"/.18-.28mm thick.
